

*Automatic Gas Volume Tester* **BQSL**  
**FreeSHAKE-8**

*Gold Standard machine for Gas  
Volume Testing.  
Its eight prominent features are ...*

1. Just set sample on this tester, and you will get a gas volume in a minute!
2. The shaking machine is eight-20 of YAYOI, which is used by a leading brand maker in the USA.
3. You can set detailed condition on testing, such as how to snift, shaking speed and time, when to read data and so on. Thus you can easily and accurately get compatible result with the hand- shaking method of Zahm&Nagel (Gold Standard method).
4. You can test samples from small bottles to 3 lit. size bottle(max. 350mm height).
5. Cam Lock Lever makes it easier to pierce plastic caps.
6. Simple design realizes easy maintenance. Calibration and change of main parts including pressure sensor and temperature sensor is possible at a site.
7. Air contents can be measured with an air burette(Optional).
8. Equipped with data output device.

*“Make your process simple!*

*High quality is expected*

*at Lower cost!”*
